Summary

Motivated Information Technology undergraduate at GL Bajaj Institute of Technology and Management (Class of 2028) with strong proficiency in C++, Data Structures, and Algorithms. Demonstrates a solid foundation in problem-solving, algorithmic thinking, and object-oriented programming. Passionate about building efficient and scalable solutions, with a growing interest in Artificial Intelligence and Machine Learning. Eager to apply technical skills to real-world challenges while continuously learning and adapting to new technologies. Seeking opportunities to contribute to innovative software development projects with a growth-oriented mindset.

Education

B.Tech in Information Technology	2024 – 2028
GL Bajaj Institute of Technology and Management	
CGPA: 6.91	
Intermediate (CBSE)	2024
St. Johns Senior Secondary School	
88.6%	
High School (UP BOARD)	2022
St. Johns Senior Secondary School	
90.8%	

Projects

MediConnect – Doctor-Patient Appointment & Video Consultation System

- Developed a full-stack healthcare platform enabling user registration, authentication, and appointment booking between doctors and patients.
- Built the project entirely using Cursor AI, leveraging AI-assisted development for faster implementation and optimization.
- Implemented JWT-based authentication and role-based authorization for secure access control.
- Designed RESTful APIs for managing users, doctors, and appointments including booking, retrieval, and cancellation.
- Integrated real-time video consultation using WebRTC (Socket.io, PeerJS).
- Built backend using Node.js, Express, and MongoDB with secure password hashing.

Library Management System (C++ & Data Structures)

- Developed a database-driven system to manage books, users, and borrowing transactions.
- Implemented features including book search, issue/return system, and user record management.
- Designed relational database schema for inventory and transaction tracking.
- Applied object-oriented programming principles for modular design.

Skills

Technical Skills:

Languages: C++, Python, C, HTML, CSS

Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)

Additional: Prompt Engineering, Git, GitHub

Personal Skills:

Communication, Public Speaking, Event Management

Achievements

- Solved 150+ Data Structures and Algorithms problems across topics like recursion, binary search, linked lists, and stacks.
- Completed foundation level of B.S. in Data Science from IIT Madras.
